Objective

Software Developer with MCA degree and hands-on experience in Java, Python, SQL, and full-stack development. Built real-world applications including web platforms, mobile apps, and intelligent recommendation systems. Strong foundation in OOP, DSA, DBMS, and backend logic implementation. Fast-learning, detail-oriented, and capable of delivering clean, maintainable code.

Education

- New Horizon college of Engineering** Ongoing
Master of computer Applications(MCA)
- Kristu Jayanti College,Autonomous** 2021-2024
Bachelor Of Computer Applications(BCA)
8.04/10
- New Horizon Pre University College** 2019-2021
12th/Pre-University Course(PUC)
69%
- Ramana Vidyanikethana English Medium High School** 2019
10th/S.S.L.C
76.48%

Technical Skills

- Programming : JAVA,Python,C,Kotlin
- Backend : JAVA Servlets, MySQL
- Concepts : OOP's, Data Structures & Algorithm
- AI/ML Tools: Open AI

Internship

- Brothers Integrated Rural Development Society (BIRDS)**
During my internship at Brothers Integrated Rural Development Society (BIRDS), I assisted in digitizing large sets of organizational records into secure cloud-based systems, improving accessibility and data hygiene. I also supported WordPress website maintenance and design tasks, contributing to a more structured and user-friendly online presence. The experience strengthened my technical skills, attention to detail, and ability to work within a real-world organizational environment.

Projects

- TalentInsight Analyzer**
An intelligent resume-analysis tool that extracts key skills from uploaded resumes using Python and open AI model, then matches them with job requirements stored in a SQL database. The system identifies skill gaps and recommends relevant skills or learning paths, demonstrating strong data processing and backend logic.
- Location Based utility recommender System**
A web application that recommends nearby utilities such as hospitals, ATMs, restaurants, etc., based on user geolocation. Built using Java Servlets and SQL on the backend with HTML/CSS for the interface, it integrates Geoapify API to fetch real-time location data and provides filtered recommendations with optimized query handling for faster performance.
- Brain Vault App**
An Android note-taking app developed in Kotlin with cloud support via Firebase. It allows users to create, categorize, and securely store notes, enabling cross-device synchronization and offline accessibility. The app follows MVVM architecture and implements Firebase Authentication for secure user access.

- **Legal Automation System**

A desktop-based case-management system built using VB.NET and SQL for role-based access involving admin, lawyers, and clients. It enables case tracking, document management, and fee handling in one centralized platform, improving workflow efficiency and reducing manual record-keeping.

Skills

- Adaptability
- Problem solving
- Time Management
- Team Collaboration

Certifications

- **Advanced Java**

By Kristu Jayanti College of Autonomous, Bengaluru
